Underwater Wet Welding

'A Welder's Mate'

David J Keats

Dip.Eng., L.Eng., Sen.M.Weld.I
International Welding Technologist / Senior Welding Inspector

Underwater Wet Welding

David J Keats

Dip.Eng., L.Eng., Sen.M.Weld.I
International Welding Technologist / Senior Welding Inspector

This manual contains step-by-step procedures for performing successful underwater wet-stick welding operations. It will aid all those seeking to better understand the parameters involved in wet welding, but it also includes many other relevant sections all closely related to welding. It also shows how to achieve the best results with any particular technique when carrying out wet welding. Practical exercises on the three basic techniques are also given at the end of the manual.

This is the second book in a series prepared by David J Keats, Managing Director of Speciality Welds Ltd, a company specialising in welding consultancy, welder training and manufacture of underwater welding equipment and consumables.

This new edition has been extensively revised, and now includes the use of photographs, case histories, heat treatment, iron and steel, properties of metal and mock examination questions.

David has been involved within the welding industry for nearly 30 years, beginning initially as a welder, progressing to welding inspector and NDT technician, then as an offshore diver-welder and ultimately gaining credits in ONC/HNC in Metals Technology and finally a Diploma in Welding Technology.

Certified International Welding Technologist
Senior Welding Inspector

Contents

	Preface	ix
	Acknowledgements	xi
	About the Author	xii
Chapter 1	**Introduction**	
1.1	Early history	1
1.2	A case for wet-welding	2
1.3	Principles of operation	4
1.4	Nature of the arc	7
1.5	Basic techniques used	10
1.6	Planning considerations	15
Chapter 2	**Equipment**	
2.1	Electrical supply	23
2.2	Types of welding plant	25
2.3	Duty cycle	29
2.4	Welding cable, current rating & voltage drop	32
2.5	Safety switches	35
2.6	Polarity	36
2.7	Personal equipment & small tools	37
Chapter 3	**Health and Safety**	
3.1	General safety in the welding shop	43
3.2	Safe start-up and shut down procedures	52
Chapter 4	**Underwater Welding Parameters**	
4.1	Characteristics of the welding arc	53
4.2	Electrode size/type, welding speed & technique	59
4.3	Water environment, pressure & characteristics	63
4.4	Magnetism & its effects	65
4.5	Methods of correcting arc blow	67
4.6	Effective demagnetisation techniques	67

Chapter 5	**Welding Electrodes**	
5.1	Covered Electrodes	71
5.2	Functions of the flux	72
5.3	Electrode identification	79
5.4	Classifications of flux coatings	84
5.5	Handling & care of electrodes	90
Chapter 6	**Terminology**	
6.1	Terms used in welding	93
6.2	Joints & welding positions	97
6.3	Identification & prevention of common welding defects	101
Chapter 7	**Iron and Steel**	
7.1	Iron & steel making	113
7.2	The blast furnace and the iron produced	115
7.3	The basic oxygen steelmaking process	118
7.4	The electric arc steelmaking process	119
7.5	What is steel	121
7.6	Properties required for structural steels	123
7.7	The effects of common alloying elements	124
7.8	Alloying elements used in low alloy structural steels	125
7.9	General engineering & structural steels	126
7.10	Introduction to the designation system	128
Chapter 8	**Structure and Properties of Metal**	
8.1	Mechanical properties of metal	131
8.2	Crystalline structures of metals	138
8.3	Production of grain structures during solidification	142
8.4	Defects occurring during solidification	145
8.5	ASTM grain size & correct sampling techniques	147
8.6	Metal deformation processes (Strengthening mechanisms I)	147
8.7	Effect of working temperature on final grain shape	148
8.8	Recrystallization of worked structures	149
8.9	Effects of hot/cold working on mechanical properties	150
Chapter 9	**Basic Metallurgy**	
9.1	Crystal & grain structures found in steel	151
9.2	Eutectoid reaction	155
9.3	Thermal equilibrium diagrams (phase diagrams)	158
9.4	Effect of cooling rate on microstructure	160
9.5	Time temperature transformation curves	165
9.6	Strengthening mechanisms (II)	168

Chapter 10	**Welding Metallurgy**	
10.1	Weldability of steel	171
10.2	Microstructures of surface welds	185
10.3	Microstructures of underwater wet-welds	190
Chapter 11	**Heat Treatments**	
11.1	An introduction to heat treatment	197
11.2	Full annealing & normalising	199
11.3	Stress relief annealing	202
11.4	Quenching & tempering	203
Chapter 12	**Quality Assurance and Quality Control**	
12.1	Definition of quality assurance & quality control	207
12.2	Welding procedures & qualifications	211
12.3	The AWS underwater welding specification	214
12.4	The UK/European underwater welding standard	216
12.5	Weld examination principles & techniques (I)	219
12.6	Weld examination principles & techniques (II)	226
Chapter 13	**Taking a Closer Look**	
13.1	Case history (I)	231
13.2	Typical wet welding quality	237
13.3	Case History (II)	240
13.4	Case History (III)	250
Chapter 14	**Practical Exercises**	
14.1	Preparing to weld	253
14.2	Practical exercise sheets	260
Chapter 15	**Testing Times**	
15.1	National vocational qualification system	269
15.2	Weldcraft-Pro course syllabus	271
Appendix 1	**Examination Questions**	
	Multichoice Assessment Questions	277
Index		295
