# Contents

## I *The Human Machine*

A.	Introduction . . . . .	1
B.	The Mechanics of Movement . . . . .	2
1.	Bones . . . . .	3
2.	Joints . . . . .	3
3.	Muscles . . . . .	3
C.	The Production of Energy . . . . .	6
1.	The Fuel . . . . .	6
2.	The Chemical Laboratory . . . . .	9
D.	The Transportation System . . . . .	9
1.	The Heart . . . . .	10
2.	Arteries, Capillaries, and Veins . . . . .	12
3.	The Blood . . . . .	13
4.	Blood Circulation . . . . .	13
E.	Temperature Control . . . . .	15
F.	Gas Exchange . . . . .	17
G.	The Information Receptors . . . . .	22
1.	Vision and the Eye . . . . .	22
2.	Hearing and the Ear . . . . .	24
3.	Equilibrium and the Inner Ear . . . . .	29
4.	Taste and Smell . . . . .	31
5.	Touch . . . . .	31
6.	Kinesthetic and Organic Sensibilities . . . . .	33
H.	Body Measurement (Anthropometrics) . . . . .	33
I.	Psychological Overlay . . . . .	33
1.	The Brain and Its Functions . . . . .	38
2.	Communication . . . . .	39
3.	Man-Machine Relationship . . . . .	40
4.	Memory . . . . .	41

5. Motivation . . . . .	41
6. Stress . . . . .	43
References . . . . .	43

## II

### *The Ocean as an Environment*

A. Introduction . . . . .	45
B. Physical and Chemical Properties of Sea Water . . . . .	45
1. Pressure and Depth . . . . .	46
2. Specific Gravity . . . . .	50
3. Density . . . . .	50
4. Salinity . . . . .	51
5. Compressibility . . . . .	51
6. Electrical Conductivity . . . . .	54
7. Thermal Properties of Sea Water . . . . .	54
a. Temperature . . . . .	54
b. Thermal Expansion . . . . .	56
c. Thermal Conductivity . . . . .	57
d. Specific Heat . . . . .	57
e. Latent Heat of Evaporation . . . . .	57
f. Adiabatic Temperature Changes . . . . .	58
8. Colligative Properties of Sea Water . . . . .	58
a. Vapor Pressure Lowering . . . . .	58
b. Freezing Point . . . . .	59
c. Osmotic Pressure . . . . .	60
9. Transmission of Sound in Sea Water . . . . .	60
a. Dispersion, Scattering, and Reflection . . . . .	61
b. Absorption . . . . .	61
10. Light Transmission in Sea Water . . . . .	63
a. Extinction Coefficient . . . . .	64
b. Absorption Coefficient . . . . .	66
c. Refractive Index . . . . .	66
11. Summary . . . . .	68
C. Coping with Waves, Tides, and Currents . . . . .	68
1. General Background . . . . .	68
2. Waves . . . . .	74
3. Surf . . . . .	76
4. Currents . . . . .	77
a. Currents in Oceans and Large Lakes . . . . .	77
b. Rip Currents . . . . .	78
c. Tides and Tidal Currents . . . . .	78
d. Diving in Currents . . . . .	79
e. Effects of Currents on Undersea Operations . . . . .	80

5. Shoreline Diving Entries . . . . .	81
a. Sand Beach Entry . . . . .	81
b. Rock Shore Entry . . . . .	83
References . . . . .	83

## III

*Man in the Ocean Environment: Physical Factors*

A. Basic Concepts . . . . .	85
B. Gases . . . . .	86
C. Solubility and Partial Pressures . . . . .	88
D. Buoyancy . . . . .	90
E. Effects of Increased Pressure . . . . .	91
1. Aural Barotrauma . . . . .	93
a. Aural Barotrauma of Ascent . . . . .	93
b. Aural Barotrauma of Descent . . . . .	94
c. External-Ear Barotrauma . . . . .	95
d. Prevention of Aural Barotrauma . . . . .	95
2. Blowup . . . . .	97
3. Gastrointestinal Barotrauma . . . . .	97
4. Pulmonary Barotrauma . . . . .	97
5. Sinus Barotrauma . . . . .	103
6. Squeeze . . . . .	103
7. Toothache . . . . .	104
8. Vertigo . . . . .	104
References . . . . .	104

## IV

*Man in the Ocean Environment: Physiological Factors*

A. Respiration in a Hyperbaric Environment . . . . .	107
1. Introduction . . . . .	107
2. Physiology of Respiration . . . . .	108
a. General Respiratory Function . . . . .	108
b. Oxygen Requirements . . . . .	112
c. Carbon Dioxide Elimination . . . . .	113
d. Control of Respiration . . . . .	113
e. Breath-Hold Diving . . . . .	114
f. Hyperventilation . . . . .	114
3. Alveolar Ventilation . . . . .	116
a. Dead Space . . . . .	116
b. Ventilation and Carbon Dioxide . . . . .	116

c.	Ventilation and Oxygen	117
d.	Exertion at Depth	118
e.	Gas Exchange	119
4.	Respiratory Mechanics	120
a.	General Considerations	120
b.	Ambient Pressure Differences	122
c.	Pressure Differences Caused by Immersion	123
d.	Lung Volume Alterations Caused by Postural Changes	124
5.	The Work of Breathing	125
a.	General Considerations	125
b.	The Breathing Mixture, Gas Density	125
c.	Flow Rates	126
d.	Maximum Breathing Capacity and Flow Rates	127
e.	Resistance to Breathing in Self-Contained Diving	128
f.	Respiratory Rate and Hyperbaric Environments	133
6.	Conclusion	133
B.	Cardiovascular Factors	135
1.	Immersion to the Neck	135
a.	Negative-Pressure Breathing	135
b.	Density	136
c.	Water Temperature	136
d.	Intrathoracic Blood Volume	137
2.	Breath-Hold Diving	138
a.	Diving Bradycardia in Man	140
b.	Water Temperature	140
c.	The Role of Cold Receptors on the Face	142
d.	Cardiac Arrhythmia	142
e.	Cardiac Output	142
f.	Venous-Return Mechanism	143
g.	Effect of Changes in Ambient Pressure	144
3.	Air Scuba Diving	144
a.	Effects of Oxygen at High Pressure	147
b.	Effects of Depth	147
4.	Mixed-Gas Saturation Diving	148
a.	Changes in Heart Rate	148
b.	Effects of Gas Density	148
c.	Temperature	149
d.	Effects of Helium	150
C.	Oxygen Toxicity	150
1.	Pulmonary Oxygen Toxicity	153
a.	Toxic Effects upon Lung Pathology	153
b.	Effects upon Pulmonary Function	154
c.	Signs and Symptoms of Pulmonary Oxygen Poisoning	156
d.	Tolerance	156
e.	Mechanisms	157

f. Treatment . . . . .	158
g. Prevention . . . . .	158
2. CNS Oxygen Toxicity . . . . .	161
a. Convulsions . . . . .	161
b. Mechanisms . . . . .	172
c. Treatment . . . . .	172
d. Residual Effects . . . . .	173
e. Prevention . . . . .	173
3. Other Toxic Effects . . . . .	174
a. The Eye . . . . .	174
b. The Blood . . . . .	175
D. Physiological Aspects of Nitrogen Narcosis . . . . .	175
1. Narcotic Potency and Possible Mechanisms . . . . .	176
2. Interactions . . . . .	178
a. Carbon Dioxide . . . . .	178
b. Hypoxia and Hyperbaric Oxygen . . . . .	179
3. Neurological Measurements . . . . .	181
a. EEG Activity . . . . .	181
b. Alpha Blocking and Critical Fusion Frequency (CFF) . . . . .	182
c. Evoked Brain Responses . . . . .	183
4. Predisposition . . . . .	184
5. Adaptation . . . . .	185
E. The Physiology of Breathing Mixtures . . . . .	186
1. General Planning Considerations . . . . .	186
2. Properties of Gas . . . . .	189
3. Factors Relating to Choice of Gas . . . . .	189
a. Oxygen: Metabolic Needs and Toxicity . . . . .	189
b. Inert Gas Narcosis . . . . .	193
c. HPNS and Hyperbaric Arthralgia . . . . .	193
d. Density and Viscosity . . . . .	194
e. Voice Distortion . . . . .	195
f. Thermal Properties . . . . .	195
g. Decompression Considerations and Counterdiffusion . . . . .	196
h. Fire Safety . . . . .	198
i. Cost and Logistics . . . . .	198
4. Conventional Breathing Mixtures . . . . .	200
a. Air and Nitrogen–Oxygen Mixtures . . . . .	201
b. Helium (Mixed-Gas Diving) . . . . .	201
c. Oxygen . . . . .	202
5. Experimental Breathing Mixtures . . . . .	202
a. Hydrogen . . . . .	202
b. Neon . . . . .	203
c. Argon . . . . .	204
d. Other Gases . . . . .	204
e. Liquid Breathing . . . . .	205

6.	Breathing-Gas Purity Standards	205
a.	Purity Standards	206
b.	Contaminants	206
c.	Testing	207
7.	Physiology of the Wrong Gas	208
a.	Low Oxygen (Hypoxia)	208
b.	High Oxygen (Hyperoxia)	209
c.	Lack of Inert Gas	210
d.	High Carbon Dioxide (Hypercapnia)	210
e.	Low Carbon Dioxide (Hypocapnia)	212
f.	Inert Gas Narcosis	212
g.	Carbon Monoxide	212
F.	The High Pressure Nervous Syndrome and Other High-Pressure Effects	213
1.	History	213
2.	The High Pressure Nervous Syndrome	214
a.	Tremor	215
b.	Convulsions	218
c.	Somnolence and EEG Changes	220
d.	Dizziness and Nausea	221
3.	Hyperbaric Arthralgia	223
4.	Hyperbaric Bradycardia	224
5.	Etiology and Mechanisms	225
a.	HPNS	225
b.	Hyperbaric Arthralgia	226
6.	Alleviation	226
a.	Compression Schedule	226
b.	Pharmacological	228
7.	Areas in Need of Further Study	229
G.	Cold	230
1.	Thermoregulation in Man	230
a.	The Role of the Hypothalamus	230
b.	Maintaining Body Temperature	231
c.	Effects of Thermal Stress	231
2.	Problems of Cold Exposure in Underwater Work	232
a.	Immersion and Surface Swimming	232
b.	Shallow and Deep Dives Using Air or Helium-Oxygen	233
c.	Deep Saturation Diving, Dry Chambers	235
d.	Saturation Diving, Open-Sea or "Wet-Pot" Chambers	237
3.	Methods of Measurement	240
4.	Physiological Effects of Cold in Underwater Operations	241
a.	Nervous System	242
b.	Cardiovascular-Renal System	243
c.	Respiratory System	244
d.	Endocrine System	246
e.	Miscellaneous Effects of Cold	248
H.	Diet and Metabolism	248

*Man in the Ocean Environment: Psychophysiological Factors*

A. Vision . . . . .	271
1. Basic Processes of the Eye . . . . .	271
a. Introduction . . . . .	271
b. Functioning of the Eye . . . . .	271
2. Photopic or Daylight Vision . . . . .	273
a. Visual Acuity in Air . . . . .	273
b. Visual Acuity under Water . . . . .	275
c. Depth Perception . . . . .	278
d. Perception of Size, Shape, Position, and Color . . . . .	283
3. Scotopic Vision . . . . .	288
a. Scotopic Vision under Normal Conditions . . . . .	288
b. Scotopic Vision under Water . . . . .	290
4. Effect of Underwater Experience . . . . .	290
5. Underwater Optical Equipment . . . . .	291
a. Masks . . . . .	291
b. Underwater Contact Lenses . . . . .	293
6. Others Factors Affecting Vision under Water . . . . .	296
a. Effect of Confining Quarters on Acuity . . . . .	296
b. Effects of Pressure . . . . .	297
c. Effects of Oxygen . . . . .	298
d. Effects of Nitrogen . . . . .	299
e. Effects of Drugs . . . . .	299
B. Hearing . . . . .	299
1. Underwater Hearing and Air- and Bone-Conducted Hearing . . . . .	300
2. Absolute Thresholds of Underwater Hearing . . . . .	301
a. General . . . . .	301
b. Measurement of Threshold Values . . . . .	301
c. Effect of Air in External Auditory Meatus . . . . .	303
d. Effect of Depth . . . . .	303
e. Effect of Wearing a Hood . . . . .	303
3. Underwater Auditory Discriminations . . . . .	303
4. Localization of Underwater Sounds . . . . .	305
5. Maximum Intensity for Safe Underwater Hearing . . . . .	306
6. Human Auditory Responses to Air-Pressure Changes . . . . .	307
a. Pressure Equalized across the Eardrum . . . . .	307
b. Mild Differential Pressures across the Eardrum . . . . .	308
c. Occluded Eustachian Tube . . . . .	309
d. Middle-Ear Involvement . . . . .	309
e. Inner-Ear Involvement . . . . .	310
f. Central Nervous System Involvement . . . . .	311
7. Incidence of Auditory Involvement . . . . .	312
a. Among Swimmers Generally . . . . .	312
b. Among Amateur Skin and Scuba Divers . . . . .	312
c. Among Caisson Workers . . . . .	312

d. Among Inexperienced Hyperbaric Chamber Subjects and Diving Trainees . . . . .	313
e. Among Professional Divers . . . . .	313
f. Among Breath-Hold Divers . . . . .	313
C. Vestibular Function . . . . .	314
1. Introduction . . . . .	314
2. Symptoms of Vestibular Problems . . . . .	315
a. Motion Sickness . . . . .	315
b. Nystagmus . . . . .	316
c. Vertigo . . . . .	316
3. Vestibular Dysfunction in Diving . . . . .	317
a. Vertigo Associated with Inadequate Middle-Ear Clearing . . . . .	318
b. Vestibular Decompression Sickness . . . . .	319
c. Isobaric Vertigo . . . . .	321
D. Other Sensory Functions . . . . .	322
1. Taste and Smell . . . . .	322
2. Kinesthetic, Proprioceptive, and Organic Effects . . . . .	322
3. Touch . . . . .	322
Terminology, Physical Constants, and Definitions of Terms . . . . .	323

*Man in the Ocean Environment: Performance*

A. Introduction . . . . .	333
B. Tests and Measures of Diver Performance . . . . .	338
1. Tactile Sensitivity . . . . .	338
a. Vibratory Sensitivity . . . . .	338
b. Two-Point and Two-Edge Sensitivity . . . . .	340
c. Point-Pressure Sensitivity . . . . .	341
d. Pressure Reproduction . . . . .	341
e. Towse Touch Test . . . . .	342
2. Biomechanical Forces . . . . .	343
a. Handgrip Strength . . . . .	343
b. Hand-Torqueing Strength . . . . .	344
c. Rotary and Linear Forces . . . . .	344
d. Lifting and Pulling Forces . . . . .	346
e. Multiple-Force Test Platforms . . . . .	346
3. Steadiness and Tremor . . . . .	350
a. Tremor Transducers . . . . .	350
b. Paper/Pencil and Apparatus Tests . . . . .	351
c. Postural-Equilibrium Tests . . . . .	353
4. Dexterity and Assembly . . . . .	353
a. Finger-Dexterity Tests . . . . .	355

b.	Manual-Dexterity Tests . . . . .	358
c.	Assembly Tests . . . . .	362
5.	Tracking and Coordination . . . . .	365
a.	Rotary Pursuit Test . . . . .	365
b.	Two-Hand Coordination Test . . . . .	365
c.	Multidimensional Pursuit Test . . . . .	366
6.	Reaction Time and Vigilance . . . . .	367
a.	Simple Visual Reaction-Time Test . . . . .	367
b.	Choice Reaction-Time Test . . . . .	369
c.	Peripheral Light-Monitoring Test . . . . .	370
7.	Perceptual Processes . . . . .	370
a.	Postural-Orientation Tests . . . . .	370
b.	Geographic-Orientation Tests . . . . .	371
c.	Perceptual-Speed Tests . . . . .	371
d.	Time-Estimation Test . . . . .	372
e.	Hidden-Patterns Test . . . . .	372
f.	Stroop Word-Color Test . . . . .	373
g.	Wechsler Bellevue Digit-Symbol Test . . . . .	373
8.	Cognitive Processes . . . . .	373
a.	Arithmetic-Computation Tests . . . . .	374
b.	Memory Tests . . . . .	374
c.	Free-Association Test . . . . .	375
d.	Sentence-Comprehension Test . . . . .	376
e.	Conceptual-Reasoning Test . . . . .	378
f.	Navigation Problem-Solving Test . . . . .	378
9.	Mood and Adjustment . . . . .	379
a.	Task Orientation . . . . .	379
b.	Emotional Stability . . . . .	380
c.	Social Compatibility . . . . .	380
10.	SINDBAD Test Battery . . . . .	382
C.	Summaries of Performance Research in the Diving Environment . . . . .	386
1.	Performance in Hyperbaric Air . . . . .	386
a.	Cognitive-Task Performance . . . . .	387
b.	Reaction Time and Perceptual Speed . . . . .	391
c.	Dexterity-Task Performance . . . . .	393
d.	Modifying Factors . . . . .	395
2.	Performance in Hyperbaric Heliox . . . . .	401
a.	Tremor, Steadiness, and Dexterity Tasks . . . . .	401
b.	Reaction Time and Perceptual Speed . . . . .	404
c.	Cognitive Tasks . . . . .	404
3.	Work and Maneuver in a Tractionless, Viscous Medium . . . . .	409
a.	Basic Force Production . . . . .	409
b.	Swimming and Load Carrying . . . . .	416
c.	Orientation and Maneuvering . . . . .	419
4.	Performance in the Cold . . . . .	423
a.	Tactile Sensitivity . . . . .	425

b. Grip Strength . . . . .	425
c. Steadiness and Tremor . . . . .	428
d. Dexterity and Assembly . . . . .	429
e. Tracking and Coordination . . . . .	430
f. Reaction Time and Vigilance . . . . .	436
g. Memory and Other Cognitive Processes . . . . .	438
5. Adjustment to Isolation and Confinement in Habitats . . . . .	441
a. Performance and Adjustment in SEALAB II . . . . .	441
b. Performance and Adjustment in TEKTITE . . . . .	444
6. Reactions to Generalized Stress in the Diving Experience . . . . .	456
a. Dexterity and Assembly Tasks . . . . .	456
b. Vigilance Monitoring . . . . .	460
c. Time Estimation . . . . .	460

## VII

### *Decompression Sickness*

A. Introduction . . . . .	467
B. Factors Relevant to the Pathogenesis of Decompression Sickness . . . . .	469
1. Physical Factors . . . . .	470
a. Inert Gas Solubility . . . . .	470
b. Bubble Nucleation and Growth . . . . .	472
2. Biological Factors . . . . .	478
a. Pulmonary Exchange . . . . .	479
b. Transdermal Exchange . . . . .	479
c. Blood Flow and Distribution between and within Tissues . . . . .	480
d. Site of Bubble Nucleation and Growth . . . . .	483
e. Diffusion and Convection in Tissues . . . . .	483
3. Summary . . . . .	485
C. Diagnosis . . . . .	485
1. Incidence of Decompression Sickness and Appearance of Symptoms . . . . .	485
2. Major Symptoms . . . . .	486
3. New Methods of Diagnosis . . . . .	490
a. Physical Methods . . . . .	491
b. Biochemical Methods . . . . .	493
D. Prevention . . . . .	493
1. Preparation . . . . .	494
2. Operational Factors that Influence Decompression Procedures . . . . .	495
3. Decompression Schedules . . . . .	496
a. Models Utilized to Compute Decompression Schedules . . . . .	497
b. Decompression Schedules Available for Human Use . . . . .	505
c. Air Decompression Schedules . . . . .	505
d. Mixed-Gas Decompression Schedules . . . . .	517

E.	Treatment . . . . .	526
1.	Diagnosis and Emergency Action during Transportation to a Recompression Chamber . . . . .	527
2.	Recompression Treatment . . . . .	528
F.	Decompression Schedules . . . . .	534
1.	U. S. Navy Decompression Schedules for Subsaturation Air Diving . . . . .	534
a.	Schedule 1.1: U. S. Navy Standard Air Decompression Table . . . . .	534
b.	Schedule 1.2: No-Decompression Limits and Repetitive Group Designation Table for No-Decompression Air Dives . . . . .	534
c.	Schedule 1.3: Surface Interval Credit Table for Air Decompression Dives . . . . .	534
d.	Schedule 1.4: Repetitive Dive Timetable for Air Dives . . . . .	535
e.	Schedule 1.5: U. S. Navy Standard Air Decompression Table for Exceptional Exposures . . . . .	535
f.	Schedule 1.6: Surface Decompression Table Using Oxygen . . . . .	536
g.	Schedule 1.7: Surface Decompression Table Using Air for Air Diving . . . . .	536
2.	Decompression Schedules for Compressed Air Work . . . . .	559
a.	Decompression Tables . . . . .	559
b.	Repetitive Diving Procedures . . . . .	560
c.	Suggestions for the Guidance of Compressed Air Workers . . . . .	560
3.	Surface Decompression Table for Saturation Diving with Air (Schedule 3.1) . . . . .	579
a.	Limits . . . . .	579
b.	Surfacing Instructions . . . . .	579
4.	Air Excursion Tables for Saturation Diving on Air or N <sub>2</sub> -O <sub>2</sub> Mixtures . . . . .	580
5.	Decompression Schedules for Subsaturation He-O <sub>2</sub> Diving . . . . .	583
a.	Schedule 5.1: He-O <sub>2</sub> Partial Pressures—40–380 ft . . . . .	583
b.	Schedule 5.2: Helium-Oxygen Decompression Schedule (Normal and Exceptional Exposures) . . . . .	583
c.	Schedule 5.3: Emergency Schedule (He-O <sub>2</sub> ) . . . . .	583
d.	Schedule 5.4: Emergency Schedule (Air) . . . . .	584
e.	Schedule 5.5: Helium-Oxygen Decompression Schedule for Mixed-Gas Scuba Using 68% Helium-32% Oxygen Supply Mixture . . . . .	584
f.	Schedule 5.6: Helium-Oxygen Decompression Table for Mixed- Gas Scuba Using 68% Helium-32% Oxygen Supply Mixture and Oxygen Decompression . . . . .	584
g.	Schedule 5.7: No-Decompression Limits and Repetitive Group Designation Mixed-Gas Scuba No-Decompression Table for Helium-Oxygen Dives . . . . .	585
h.	Schedule 5.8: Surface Interval Credit Table for Mixed-Gas Scuba Helium-Oxygen Decompression Dives . . . . .	585
i.	Schedule 5.9: Repetitive Dive Timetable for Mixed-Gas Scuba Helium-Oxygen Dives . . . . .	586

6.	Decompression Procedures for Excursion Diving from Saturation, While Breathing He-O <sub>2</sub> Gas Mixtures.	609
