Submersible Technology: Adapting to Change

Proceedings of an international conference ('SUBTECH '87—
Adapting to Change') organized jointly by the Association
of Offshore Diving Contractors and the Society for
Underwater Technology, and held in Aberdeen, UK, 10–12 November 1987

0412014

Contents

Part I An Overview of R & D, Past, Present and Future

CHAPTER 1	Sources of funding for research and development in oil and gas technology R. Ebbers	3
CHAPTER 2	The funding of the Hydra-Lok swage pile connection development J. M. Lowes	13
CHAPTER 3	The drill support tooling module project B. G. Redden	17

Part II Reassessment of Standards and Operating Practices

CHAPTER 4	Review of standards, codes, requirements and regulations—their impact on underwater projects T. A. Hollobone	25
CHAPTER 5	Standardization—Norwegian experience by Nifo—Norsk Industriforening for Oljeselskap W. B. Norton	39
CHAPTER 6	Code of practice for the safe and efficient operation of remotely operated vehicles A. J. Sandford	45
CHAPTER 7	Adapting ROV operations procedures to today's market J. Mann	51
CHAPTER 8	Using project management as a tool—a necessity in today's underwater contracting industry G. P. Gilbert	55

CHAPTER 9	The CSWIP scheme: a personal view from the Chairman of the Board T. J. H. Webborn	67
-----------	--	----

**Part III
Saturation Diving**

CHAPTER 10	Higher efficiency through improved diver transportation A. Haegglin	77
CHAPTER 11	Standards for underwater breathing apparatus C. Tarmey	89
CHAPTER 12	Monitoring of bacterial status and antibacterial cleaning of saturation diving systems S. T. Brooke, P. R. Blewett and C. M. Childs	101
CHAPTER 13	HYDRA 8: Pre-commercial hydrogen diving project J. P. Imbert, C. Gortan, X. Fructus, T. Ciesielski and B. Gardette	107
CHAPTER 14	Diver selection for deep dives (below 300 msw) S. T. Brooke	117
CHAPTER 15	Saturation diving: diving deeper than 300m P. Rosengren	129

**Part IV
Diving Shallower Than 50m**

CHAPTER 16	Mathematical modelling of tissue bubble dynamics during decompression M. L. Gernhardt	135
CHAPTER 17	An evaluation of automatic recording of commercial air-diving data J. Hendrick	147
CHAPTER 18	Civil engineering working practices and standards D. R. Shiers and P. Sellern	153

CHAPTER 19	The future of diver training A. D. Bax	159
CHAPTER 20	Decompression sickness in commercial air divers. The present status of the Shields/Lee report T. G. Shields	169

CHAPTER 21	Clinical presentations and significance of decompression sickness: an analysis of incidents from commercial diving operations 1977-87 C. M. Childs	175
------------	---	-----

**Part V
Developments in Underwater Intervention
(Including Robotic Systems)**

CHAPTER 22	Design, installation and operation of an ROV-operated subsea production system in 450 msw F. R. Frisbie, E. W. Hughes and C. E. Brown	197
CHAPTER 23	The role of two new autonomous diving systems in underwater intervention G. S. Hawkes and S. A. Earle	207
CHAPTER 24	Wellman: the subsea intervention system E. W. Nesse, H. Lindland, R. Husebye and K. Höglund	215
CHAPTER 25	An overview of current projects in the field of diverless subsea production systems P. E. Hadfield and S. M. Adamson	223
CHAPTER 26	Advanced robotics under water: the DTI initiative R. W. Barrett	247
CHAPTER 27	New developments in flooded member detection A. M. Leonard	257
CHAPTER 28	Progress of automation in remote intervention tasks D. J. Partridge	265
CHAPTER 29	Operational automatic hyperbaric welding J. Blight and G. Hutt	277

Part VI
Diversification and Innovation—Adapting to Change

CHAPTER 30	Resources from the sea programme—a technical challenge D. M. Hoddinott and A. H. Ruyten	289
CHAPTER 31	The return of the manned submersible—a new dawn? D.J. Hampson	299
CHAPTER 32	Seabed contact vehicles J. S. Wood	309
CHAPTER 33	Diversification and innovation: adapting to change—or the view of one small business J. Turner	319
*CHAPTER 34	University/Industry/Governmental Interfaces— Joint R & D Projects—Do They Work? G. Russell	329

* Late addition from Part I

ADVANCES IN UNDERWATER TECHNOLOGY, OCEAN SCIENCE AND OFFSHORE ENGINEERING

Volume 1: Developments in Diving Technology

Volume 2: Design and Installation of
Subsea Systems

Volume 3: Offshore Site Investigation

Volume 4: Evaluation, Comparison and
Calibration of Oceanographic Instruments

Volume 5: Submersible Technology

Volume 6: Oceanology

Volume 7: Subsea Control and Data Acquisition

Volume 8: Exclusive Economic Zones

Volume 9: Stationing and Stability
of Semi-Submersibles

Volume 10: Modular Subsea Production Systems

Volume 11: Underwater Construction:
Development and Potential

Volume 12: Modelling the
Offshore Environment

Volume 13: Economics of
Floating Production Systems

Volume 14: Submersible Technology:
Adapting to Change

Volume 15: Technology Common to
Aero and Marine Engineering

Volume 16: Oceanology '88
