# Contents

<b>Preface</b>		<b>xiii</b>
<b>Acknowledgements</b>		<b>xv</b>
<b>Chapter One</b>	<b>General Diving</b>	<b>1</b>
1.1	Introduction	1
1.2	Medical Qualifications	1
1.3	Proficiency Qualifications	2
1.4	Duties and Responsibilities	3
1.5	Manning	7
1.6	Selection of Equipment and Location	7
1.7	Diver Communications and Lifelines	7
1.8	Diving Depth Limits	8
1.9	Compressed Air Supplied for Breathing	9
1.10	Mixed Gas Supply	10
1.11	Deck Decompression Chamber	10
1.12	Submersible Decompression Chamber	10
1.13	Decompression Procedures	11
1.14	Diving in Current	11
1.15	Emergency Operational Procedures	12
1.16	Reports and Records	12
1.17	Location Warning Signals	17
1.18	Rope Signals (Royal Navy Standard)	18
1.19	Sound Signals	19
1.20	Hand Signals	19
1.21	Phonetic Alphabet	21
1.22	Diver's Dress and Personal Equipment	21
1.23	Compression Rates	21
1.24	Diving Gas Cylinders	23
1.25	Diving Above Sea Level	23
1.26	Flying Restrictions	24
<b>Chapter Two</b>	<b>Scuba Diving</b>	<b>25</b>
2.1	General	25
2.2	Use	25
2.3	Nominal Chain of Events	25
2.4	Single Failure Situations	27
2.5	Pre-dive Checks	29
2.6	Post-dive Checks	33

<b>Chapter Three</b>	<b>Surface Orientated Diving</b>	<b>34</b>
3.1	General	34
3.2	Use	34
3.3	Nominal Chain of Events—Surface Orientated Diving (Air Range)	34
3.4	Single Failure Situations—Surface Orientated (Air Range)	37
3.5	Nominal Chain of Events—Surface Orientated Diving (Mixed Gas)	39
3.6	Single Failure Situations—Surface Orientated Diving (Mixed Gas)	41
3.7	Pre-dive Checks	43
3.8	Post-dive Checks	47
<b>Chapter Four</b>	<b>Bounce Diving</b>	<b>50</b>
4.1	General	50
4.2	Use	50
4.3	Nominal Chain of Events—Systems Diving (Bounce)	50
4.4	Single Failure Situations	54
4.5	Pre-dive Checks	57
4.6	Post-dive Checks	65
<b>Chapter Five</b>	<b>Saturation Diving</b>	<b>67</b>
5.1	General	67
5.2	Breathing Gases	67
5.3	Treatment Gas	68
5.4	Atmosphere Control	68
5.5	Diver and Gas Heating	69
5.6	Pre-dive Preparations	69
5.7	Diver Pressurization	69
5.8	Saturation Living	70
5.9	Decompression	70
5.10	Planned Saturation Dive Sequence	70
5.11	Planned Saturation/Excursion Dive Sequence	71
5.12	Unplanned Saturation and Saturation/Excursion Dive Sequence	71
5.13	Nominal Chain of Events—Systems Diving (Saturation)	72
5.14	Single Failure Situations—Systems Diving (Saturation)	77
5.15	Pre-dive Checks	80

<b>Chapter Six</b>	<b>Submarine Lock-Out Diving</b>	<b>90</b>
6.1	General	90
6.2	Use	90
6.3	Nominal Chain of Events—Submersible Operations (Bounce)	91
6.4	Single Failure Situations—Submersible Operations (Bounce)	94
6.5	Nominal Chain of Events—Submersible Operations (Saturation)	97
6.6	Single Failure Situations—Submersible Operations (Saturation)	102
6.7	Pre-dive Checks	106
<b>Chapter Seven</b>	<b>Failure Analysis</b>	<b>120</b>
7.1	Incorrect or Insufficient Equipment on Hand	120
7.2	Insufficient Personnel	120
7.3	Inadequate Briefing	121
7.4	Lack of Standby Boat	121
7.5	Environmental Conditions	121
7.6	Lack of Correct Checklists	122
7.7	Lack of Supervision of Checklist Checking	122
7.8	Failure of Equipment during Checkout	122
7.9	Insufficient Gas	123
7.10	Failure of Guide Wire System	123
7.11	Failure of Main Lift Wire	124
7.12	Main Winch Failure	124
7.13	Main Umbilical Failure	125
7.14	Inability to Submerge	125
7.15	Leakage	126
7.16	Explosion	126
7.17	Implosion	126
7.18	Loss of Communications to Diver and SDC	127
7.19	Failure of SDC/Diver Heating System	127
7.20	Loss of Power to SDC	128
7.21	Loss of Compression Supply	129
7.22	Contamination of Compression Supply	130
7.23	Inability to Equalize Middle Ear	130
7.24	Suit Squeeze	130
7.25	Loss of SDC Drop Weights	131
7.26	Inability to Locate Job Site	131
7.27	Incorrect Tools/Equipment for Specific Tasks	132
7.28	Loss of Breathing Medium	132
7.29	Contamination of Breathing Mixture	133
7.30	Loss of Mask/Helmet	134

7.31	Failure of Faceplate	134
7.32	'Blow-up'	134
7.33	Injury to Diver—External or Medical Cause	135
7.34	Diver Entrapment	135
7.35	Entrapment of SDC	136
7.36	Barotrauma	136
7.37	Decompression Sickness	136
7.38	Failure of Exhaust System	137
7.39	Loss of Pressurization Capability	137
7.40	Oxygen Make-up System Failure	138
7.41	Oxygen Dump System Failure	138
7.42	Fire in Chamber	139
7.43	Oxygen Convulsions	139
7.44	Failure of Communications to Chambers	140
7.45	Sanitary System Failure	140
7.46	Life Support System Failure	141
7.47	Gas Analysis Unit Failure	141
7.48	Micro-organism Contamination of Chambers	142
<b>Chapter Eight</b>	<b>Emergencies</b>	<b>143</b>
8.1	General	143
8.2	Evacuation of Divers under Pressure	143
8.3	Recovery of Unconscious or Injured Diver	146
8.4	Loss of Communications	148
8.5	Main Lifting Wire Broken or Winch Failure	149
8.6	Umbilical Parted	150
8.7	Guide-wire System Parted	159
8.8	Fire in Living Chamber	160
8.9	Underwater Emergencies	161
<b>Chapter Nine</b>	<b>Equipment Maintenance</b>	<b>166</b>
9.1	Maintenance Programme	166
9.2	Training	166
9.3	Records	166
9.4	Compressor Output Analysis	167
<b>Chapter Ten</b>	<b>Physiological Effects of the Environment</b>	<b>175</b>
10.1	Oxygen	175
10.2	Carbon Dioxide	181
10.3	Temperature	186
10.4	Nitrogen—Nitrogen Narcosis	193
10.5	Carbon Monoxide	196
10.6	Relative Humidity	200

<b>Chapter Eleven</b>	<b>Diving System Installation/Re-Activation</b>	<b>202</b>
11.1	Introduction	202
11.2	Pressure Integrity	202
11.3	Stocking/Outfitting	204
11.4	Suggested Pre-operationally Ready Checklist	224
<b>Chapter Twelve</b>	<b>Life Support Technician Information</b>	<b>227</b>
12.1	Watch Hand-over	227
12.2	Log Keeping	229
12.3	Gas Consumption Monitoring	230
12.4	General Gas Analyser Calibration Procedure	232
12.5	Types of Analysers and Operating Principles	236
12.6	Oxygen Cleaning	240
12.7	Gas Mixing	243
12.8	Chamber Fire Safety	248
12.9	Materials Prohibited in the Chamber	256
<b>Chapter Thirteen</b>	<b>Hygiene</b>	<b>258</b>
13.1	Chamber Hygiene	258
13.2	Personnel Hygiene	260
13.3	Bacteriological Swabs	262
<b>Chapter Fourteen</b>	<b>Organization and Reporting Requirements</b>	<b>264</b>
14.1	Introduction	264
14.2	Responsibilities	264
14.3	Reporting Formats	268
14.4	Responsibilities Under Regulations	269
<b>Chapter Fifteen</b>	<b>Continuation Training for Diving and Diving Support Personnel</b>	<b>276</b>
15.1	Introduction	276
15.2	Emergency Situations to be Covered in the Training Programme	276
15.3	Medical Continuation Training Programme	279
15.4	Other Continuation Training Areas	280
15.5	Continuation Training Reports	281
15.6	Standard Marine Training Schedules	281
15.7	Continuation Training for Submersible Craft Operations	283
15.8	Medical Training Programme	286
15.9	Other Continuation Training Areas	286
15.10	Continuation Training Reports	289

<b>Chapter Sixteen</b>	<b>Weather Criteria Affecting Diving Operations</b>	<b>290</b>
16.1	Introduction	290
16.2	Tides, Currents, and Wave Heights	290
<b>Chapter Seventeen</b>	<b>Medical Reporting</b>	<b>295</b>
17.1	Emergency Medical Call-out Procedure	295
17.2	Initial Accident Report Form	297
17.3	Condition Monitoring Form	297
17.4	Decompression Sickness Checklist	301
<b>Chapter Eighteen</b>	<b>Suggested Medical Kits</b>	<b>307</b>
18.1	In-chamber/SDC First Aid Kit	307
18.2	First Aid Kit—Stored Outside Chambers	307
18.3	Diagnostic Kit	307
18.4	Emergency Equipment Kit	308
18.5	Drug Box	310
18.6	Portable Kit	311
<b>Chapter Nineteen</b>	<b>General Fractures</b>	<b>313</b>
19.1	General	313
19.2	Fractured Skull	316
19.3	Fractured Lower Jaw	317
19.4	Fractured Spine	317
19.5	Fractured Ribs	318
19.6	Fractured Breast Bone	319
19.7	Fractured Collar Bone	319
19.8	Fractured Shoulder Blade	319
19.9	Fractures of the Arm and Hand	320
19.10	Fractured Pelvis	321
19.11	Fractures of the Major Bones of the Leg	321
19.12	Fractured Knee Cap	322
19.13	Fractured Bones of Feet and Toes	323
<b>Chapter Twenty</b>	<b>First Aid (Physical Injury)—Systemic</b>	<b>324</b>
20.1	General	324
20.2	Shock	324
20.3	Pulmonary Resuscitation	326
20.4	Cardiac Resuscitation	329
20.5	Heart-Lung Resuscitation	331
20.6	Cold Exposure	332
20.7	Heat Exposure	333

<b>Chapter Twenty-One</b>	<b>First Aid (Physical Injury)—Bleeding</b>	<b>334</b>
21.1	Direct Pressure Technique for Controlling Bleeding	334
21.2	Indirect Pressure Technique for Controlling Bleeding	334
21.3	External Bleeding	335
21.4	Internal Bleeding	336
21.5	Bleeding from the Scalp	337
21.6	Fracture at Base of Skull	338
21.7	Bleeding from the Nose	338
21.8	Bleeding from the Tongue or Cheek	339
21.9	Bleeding from the Palm of the Hand	339
21.10	Chest Injuries	340
21.11	Blast Injuries	341
21.12	Underwater Blast	341
21.13	Wounds of the Abdominal Wall	342
21.14	Crush Injuries	342
<b>Chapter Twenty-Two</b>	<b>First Aid (Marine Animal Injury)</b>	<b>344</b>
22.1	Bilharziasis or Schistosomiasis	344
22.2	Cone Shell Sting	345
22.3	Coral Cuts and Stings	345
22.4	Jelly Fish Sting	346
22.5	Octopus	346
22.6	Sea Snake Bite	347
22.7	Sea Urchin Sting	349
22.8	Stonefish Sting	350
22.9	Weils' Disease (Leptospirosis)	350
<b>Chapter Twenty-Three</b>	<b>Descent Injuries</b>	<b>352</b>
23.1	Squeeze	352
23.2	Ascent	354
23.3	Problems Possible Throughout Dive	357
<b>Chapter Twenty-Four</b>	<b>Decompression Incident Treatment</b>	<b>363</b>
24.1	Rules for Recompression	363
24.2	Treatment Tables	368
24.3	Post-treatment Procedures	375
<b>Glossary</b>		<b>377</b>

<b>Appendix One</b>	<b>Graphs and Tables</b>	<b>383</b>
Table A1-1	Percentage Oxygen versus Depth (msw)	383
Table A1-2	Percentage Oxygen versus Depth (fsw)	384
Table A1-3	Partial Pressure of Oxygen versus Depth (msw)	386
Table A1-4	Partial Pressure of Oxygen versus Depth (fsw)	387
Table A1-5	Oxygen Exposure Limits	388
Table A1-6	Treatment Gas Range (5-305 msw)	389
Table A1-7	Treatment Gas Range (10-1000 fsw)	390
Table A1-8	Percentage Oxygen for Listed Partial Pressures	391
Table A1-9	Comfortable Chamber Gas Temperature for Prolonged Stay (Helium-Oxygen)	396
Table A1-10	Maximum and Minimum Inspired Gas Temperature (°C) versus Depth (msw)	396
Table A1-11	Carbon Dioxide Exposure	397
Table A1-12	Carbon Dioxide (Equal to ½ per cent or 1 per cent at Sea Level) versus Depth (msw)	397
Table A1-13	Carbon Dioxide (Equal to ½ per cent or 1 per cent at Sea Level) versus Depth (fsw)	399
Table A1-14	Carbon Monoxide (ppm) versus Time (Hours) for Acute Exposure at 1 ATA	400
<b>Appendix Two</b>	<b>Dynamically Positioned Diving Support Vessels</b>	<b>401</b>
Table A2.1	Introduction	401
Table A2.2	Operating Advantages and Hazards of Dynamic Positioning	401
A2.3	Abstracted Guidelines	402
<b>Appendix Three</b>	<b>Reference Books</b>	<b>408</b>
<b>Index</b>		<b>409</b>

# COMMERCIAL DIVING REFERENCE AND OPERATIONS HANDBOOK

Mark Freitag *and* Anthony Woods

This book is a reference manual which provides the commercial diver, diving supervisor, life support technician and operation personnel (involved in sub-sea operations), with a guide to setting up safe and efficient diving operations. Emphasis has been placed on providing the necessary information with a minimum of narration and filler material, so creating an easily accessible source of pertinent information.

The book will particularly interest commercial divers, sport divers, oil companies and diver training schools.

**Contents:** Preface; Acknowledgements; 1 General Diving; 2 Scuba Diving; 3 Surface Orientated Diving; 4 Bounce Diving; 5 Saturation Diving; 6 Submarine Lock-out Diving; 7 Failure Analysis; 8 Emergencies; 9 Equipment Maintenance; 10 Physiological Effects of the Environment; 11 Diving System Installation/Re-activation; 12 Life Support Technician Information; 13 Hygiene; 14 Organization and Reporting Requirements; 15 Continuation Training for Diving and Diving Support Personnel; 16 Weather Criteria Affecting Diving Operations; 17 Medical Reporting; 18 Suggested Medical Kits; 19 General Fractures; 20 First Aid (Physical Injury)—Systemic; 21 First Aid (Physical Injury)—Bleeding; 22 First Aid (Marine Animal Injury); 23 Descent Injuries; 24 Decompression Incident Treatment; Glossary; Appendix 1 Graphs and Tables; Appendix 2 Dynamically Positioned Diving Support Vessels; Appendix 3 Reference Books; Index.

## About the Authors

*Mark Freitag* and *Anthony Woods* have co-authored three diving manuals for North Sea and Southeast Asia diving operations. Their 25 years experience, contributing to such giants in the offshore energy industry as British Petroleum, Mobil, Phillips, Texaco and Shell International, has spanned four continents from the US to Africa, including the North Sea, Malaysia, Norway, Scotland and Kuwait.

*Mark Freitag* has served in the capacities of Subsea Consulting Project Manager, Technical Manager and Facility Manager of a hyperbaric research centre. He has been involved in the training and supervision of diving personnel in saturation techniques and the actual design of saturation systems.

*Anthony Woods's* expertise encompasses diving and diving consultation to operations management on major offshore projects. He has served as Operations Manager to international diving contractors and Subsea Consultant to major energy companies worldwide.
