FOREWORD by <i>C. J. Lambertsen</i>	vii
PREFACE	xi
1. A SHORT HISTORY OF MAN IN THE SEA <i>A. J. Bachrach</i>	1
2. THE COMPRESSED AIR ENVIRONMENT <i>A. F. Haxton and H. E. Whyte</i>	11
3. OPEN-SEA DIVING TECHNIQUES <i>J. B. MacInnis</i>	20
4. ENGINEERING PRINCIPLES OF UNDERWATER BREATHING APPARATUS <i>S. Williams</i>	34
5. PHYSIOLOGICAL PRINCIPLES OF UNDERWATER BREATHING APPARATUS <i>J. B. Morrison</i>	47
6. LIFE SUPPORT SYSTEMS <i>J. N. Miller</i>	60
7. HYDROSTATIC PRESSURE PHYSIOLOGY <i>A. G. Macdonald</i>	78
8. PULMONARY FUNCTION <i>E. H. Lanphier</i>	102
9. LIQUID BREATHING AND ARTIFICIAL GILLS <i>J. A. Kylstra</i>	155
10. OXYGEN TOXICITY <i>J. D. Wood</i>	166
11. CARBON DIOXIDE EFFECTS UNDER CONDITIONS OF RAISED ENVIRONMENTAL PRESSURE <i>K. E. Schaefer</i>	185
12. INERT GAS NARCOSIS <i>P. B. Bennett</i>	207
13. THE HIGH PRESSURE NERVOUS SYNDROME: ANIMALS <i>R. W. Brauer</i>	231
14. THE HIGH PRESSURE NERVOUS SYNDROME: MAN <i>P. B. Bennett</i>	248
15. UNDERWATER PERFORMANCE <i>A. J. Bachrach</i>	264

16. COLD EXPOSURE <i>P. Webb</i>	285
17. DECOMPRESSION THEORY: AMERICAN PRACTICE <i>R. D. Workman and R. C. Bornmann</i>	307
18. DECOMPRESSION THEORY: BRITISH PRACTICE <i>H. V. Hempleman</i>	331
19. DECOMPRESSION THEORY: SWISS PRACTICE <i>A. A. Bühlmann</i>	348
20. BIOPHYSICAL ASPECTS OF DECOMPRESSION <i>B. A. Hills</i>	366
21. EARLY QUANTITATIVE STUDIES OF GAS DYNAMICS IN DECOMPRESSION <i>A. R. Behnke</i>	392
22. ULTRASONIC SURVEILLANCE OF DECOMPRESSION <i>A. Evans</i>	417
23. THE PATHOPHYSIOLOGY OF DECOMPRESSION SICKNESS <i>D. H. Elliott and J. M. Hallenbeck</i>	435
24. THE PREVENTION OF DECOMPRESSION SICKNESS <i>D. N. Walder</i>	456
25. DECOMPRESSION DISORDERS IN DIVERS <i>D. J. Kidd and D. H. Elliott</i>	471
26. DECOMPRESSION SICKNESS IN COMPRESSED AIR WORKERS <i>P. D. Griffiths</i>	496
27. DYSBARIC OSTEONECROSIS: ASEPTIC NECROSIS OF BONE <i>R. I. McCallum</i>	504
28. AUDITORY AND VESTIBULAR FUNCTION IN DIVING <i>J. C. Farmer and W. G. Thomas</i>	522
29. DIVING ACCIDENTS <i>R. de G. Hanson and J. M. Young</i>	545
INDEX	557

## DISCLAIMER

*The opinions or assertions, contained herein are the private ones of the various authors and are not to be construed as official or reflecting the views of the Naval Department of any nation or of any Naval Service at large.*

---

Both the importance of this subject and knowledge of the physiological and technical problems involved have considerably increased since this book was first published in 1969. The book has therefore been almost entirely re-written and has been considerably enlarged to allow coverage of several new topics – for example Underwater Performance, Problems of Thermal Balance and Underwater Accidents.

This is now without doubt the most comprehensive and authoritative review of the subject available, with expert contributions from Britain, United States, Canada and Switzerland.

*From reviews of the first edition:*

“Rarely does a reviewer have the opportunity to state that the book he is considering is a landmark in the field with which it deals”.

*British Journal of Industrial Medicine*

“This book is an excellent compendium for persons involved in any manner with underwater activity or compressed air and will be a classic reference.”

*Annals of Internal Medicine*

“The publication of a book such as the present volume has been long overdue”.

*Underwater Science and Technology Journal*
