

DEEPER INTO DIVING

A diver is shown in silhouette, swimming in a deep blue underwater environment. The diver is holding a bright flashlight that illuminates the scene. Several large fish are visible, swimming around the diver. In the foreground, there is a large, intricate coral structure. The overall atmosphere is mysterious and deep.

John Lippmann

DEEPER INTO DIVING

	Page
FACE	
SECTION 1: PHYSICAL, SENSORY, PHYSIOLOGICAL AND PSYCHOLOGICAL CONSIDERATIONS	
Physical, sensory, physiological and psychological problems associated with depth.	3
Physiology.	
2.1 Respiration and circulation.	9
2.2 Effect of SCUBA diving on respiration and circulation.	36
Nitrogen uptake and elimination.	41
Bubble formation.	47
Decompression sickness.	
5.1 Cause, manifestations, management and after-effects.	59
5.2 Prevention.	93
Nitrogen Narcosis.	117
Carbon dioxide and diving.	123
Heat loss.	131
Dysbaric osteonecrosis.	145
Women and diving.	153
Drug use and the diver.	167

SECTION 2: DECOMPRESSION TABLES

12.	History of decompression tables.	177
13.	U.S. Navy Tables.	
	13.1 History and design.	185
	13.2 Using the U.S. Navy Tables.	195
	13.3 Adapting the U.S. Navy Tables to sport diving	215
14.	More conservative alternatives based on the U.S. Navy Tables.	
	14.1 The Huggins Tables.	225
	14.2 The Bassett Table.	229
	14.3 The NAUI Dive Tables.	237
15.	New U.S. Navy Tables.	239
16.	Swiss/German Tables.	
	16.1 The ZH-L System	247
	16.2 The Buehlmann Tables.	253
	16.3 The Buehlmann/Hahn Tables.	265
17.	DCIEM Tables.	279
18.	The BS-AC Tables.	
	18.1 The RNPL/BS-AC Table.	303
	18.2 The BS-AC '88 Tables.	325
19.	The PADI Recreational Dive Planner.	347

SECTION 3: ALTITUDE CONSIDERATIONS AND DIVING

20.	Flying after diving.	381
21.	Diving at altitude.	393

SECTION 4: MULTI-LEVEL DIVING

22.	Multi-level diving using tables.	423
23.	Dive computers.	443

SECTION 5: DECOMPRESSION STOP DIVING

- | | |
|--------------------------------|-----|
| 24. Decompression stop diving. | 477 |
| 25. Omitted decompression. | 485 |

SECTION 6: ADMINISTRATION OF OXYGEN TO DIVERS

- | | |
|--|-----|
| 26. Oxygen. | 499 |
| 27. Emergency in-water recompression using oxygen. | 517 |

SECTION 7: OTHER CONSIDERATIONS

- | | |
|--------------------------------------|-----|
| 28. Some equipment considerations. | |
| 28.1 Regulator performance at depth. | 525 |
| 28.2 Buoyancy considerations. | 527 |
| 29. Air supply calculations. | 531 |

APPENDICES	549

INDEX	606
--------------	------------

Deeper Into Diving is for the experienced diver, especially the diving educator. It contains information on a wide variety of decompression tables and procedures, and contains a lot of technical data that is not easily obtainable. The book also provides very valuable insights into diving physiology and various physical and medical aspects of deeper diving.

From the foreword:

"I heartily endorse this volume, not only for instructors, but for all those contemplating, or who are, deep divers. Much of this knowledge is also relevant for all kinds of diving, not just deep diving.

Indeed, I would hope that many divers will obtain and read all three (of John Lippmann's) books to date. It would be very worth their while and materially add to their diving safety and enjoyment."
