5th EDITION

BENNETT AND ELLIOTT'S PHYSIOLOGY AND MEDICINE OF DIVING

Recreational and commercial diving are more popular now than ever before. For comprehensive, up-to-date information on hyperbaric medicine, turn to Bennett and Elliott's *Physiology and Medicine of Diving*!

Universally considered the 'bible' in this field since 1969, this book offers you in-depth coverage of...

- the physiological basis of safe diving and the pathogenesis of diving illnesses.
- the clinical diagnosis and management of diving disorders.
- current equipment design and its practical clinical applications.

The 5th Edition is thoroughly updated to reflect all of the very latest developments in the field – including...

- our current understanding of central nervous system pathology.
- the newest dive computers and algorithms.
- contemporary decompression theories and their impact on decompression procedures.
- state-of-the-art treatment protocols for decompression, drowning and hypothermia.

Written and edited by leading experts from around the world, Bennett and Elliott's *Physiology and Medicine of Diving*, 5th Edition encompasses all of today's best knowledge – in a single, authoritative source!

Contributors	vii
Preface	xi
Introduction	1
<i>Christian J Lambertsen</i>	

1 An Outline History of Diving Physiology and Medicine	4
<i>David H Elliott and James Vorosmarti</i>	

2 Diving Methods	
2.1 Compressed Air Work	17
<i>Eric P Kindwall</i>	
2.2 Commercial Diving	29
<i>Michael L Gernhardt and Christian J Lambertsen</i>	
2.3 Recreational Diving	45
<i>Drew Richardson</i>	
2.4 Scientific Diving	56
<i>Michael A Lang</i>	
2.5 Empirical Diving Techniques	64
<i>Robert M Wong</i>	

3 Ventilation, Gas Exchange and Exercise Under Pressure	77
<i>Enrico M Camporesi and Gerardo Bosco</i>	

4 Thermal Considerations in Diving	115
<i>Igor B Mekjavic, Michael J Tipton and Ola Eiken</i>	

5 Breath-Hold Diving	153
<i>Massimo Ferrigno and Claes E Lundgren</i>	

6 Drowning and Nearly Drowning	181
<i>Steven D Brown and Daniela Gaitanaru</i>	

7 Comparative Diving Physiology	211
<i>Paul J Ponganis, Gerald L Kooyman and Sam H Ridgway</i>	

8 Otorhinolaryngological Aspects of Diving	227
<i>Otto Molvaer</i>	

9 Pressure Effects	
9.1 Biological Effects of Pressure	265
<i>Stephen Daniels and Yoram Grossman</i>	
9.2 Inert Gas Narcosis	300
<i>Peter B Bennett and Jean Claude Rostain</i>	
9.3 High Pressure Nervous Syndrome	323
<i>Peter B Bennett and Jean Claude Rostain</i>	
9.4 Oxygen Under Pressure	358
<i>James M Clark and Stephen R Thom</i>	

10 Decompression	
10.1 Decompression Theory	419
<i>Peter Tikuisis and Wayne A Gerth</i>	
10.2 Decompression Practice	455
<i>Robert W Hamilton and E D Thalmann</i>	
10.3 Bubble Detection	501
<i>R Y Nishi, Alf O Brubakk and Olav S Eftedal</i>	
10.4 Pathophysiology of Decompression Sickness	530
<i>T James R Francis and Simon J Mitchell</i>	
10.5 Arterial Gas Embolism and Pulmonary Barotrauma	557
<i>Tom S Neuman</i>	
10.6 Manifestations of Decompression Disorders	578
<i>T James R Francis and Simon J Mitchell</i>	
10.7 Treatment of Decompression Disorders	600
<i>Richard E Moon and Des F Gorman</i>	

11 Long Term Effects of Diving	
11.1 Long Term Effects of Diving on the Lung	651
<i>Einar Thorsen</i>	
11.2 Dysbaric Osteonecrosis	659
<i>John Paul Jones, Jr and Tom S Neuman</i>	
11.3 Long Term Effects on the Central Nervous System	718
<i>Andrew J Dutka</i>	

12 Fitness to Dive	700
<i>Alfred A Bove</i>	

13 Investigation of Diving Accidents	718
<i>James Vorosmarti</i>	

CONTENTS

14 Pathology of Diving Accidents 729

James L Caruso

15 Diving Equipment 744

Glen H Egstrom

Appendix: Some Useful Data and Formulas
