

Diving in High-Risk Environments

Fourth Edition

by Steven M. Barsky

Diving in High-Risk Environments is the most complete text covering full-face masks, wireless communications, surface-supplied diving, dry suits, contaminated water, and potable water diving operations. This fourth edition has been extensively edited and revised with new material on risks, chemical testing, diving helmets, and more. If you are professionally employed in diving, this book is a must-have reference.

This new edition of the book includes over 250 photographs, technical illustrations, tables, and charts. Included are chemical compatibility tables, an extensive bibliography, and a comprehensive index.

Diving in High-Risk Environments is widely used by divers all over the world and is recommended by companies such as Interspiro, Diving Unlimited International, Kirby Morgan Dive Systems, and Trelleborg-Viking, Inc. The book has been referenced by the U.S. Navy and the International Marine Contractors Association.

Author Steve Barsky has been involved with commercial, scientific, search and rescue, and technical diving since 1970. His years of professional diving experience bring practical techniques and methods into clear focus.
